23. Problem: (use additional Sheets if necessary)
XRP-II v3.1.3 was installed in the VATC on 08/09/00, but we've received a fix to a severity 2 bug that was detected since then. The vendor has provided a replacement for one of the executables that had been installed, and it must be included in the delivery.

24. Proposed Solution: (use additional sheets if necessary)
Deliver the replacement executable to the SMC as a second tar file to be installed as part of XRP-II v3.1.3 for testing at VATC, re-install XRP-II v3.1.3 on host t1mss03 (CM Server), EIN 00003358, according to the revised installation instructions in the attached draft PSR document (914-TDA-044-REV04), and redline the instructions. No new license keys are required.

25. Alternate Solution: (use additional sheets if necessary)
None.

26. Consequences if Change(s) are not approved: (use additional sheets if necessary)
The XRP-II upgrade cannot advance to PSR, and XRP-II users will not be able to use its enhancements to track software license data, update property records based on Maintenance Work Order records more efficiently, or update baseline records more effectively.
